

To fill in the masked entities, I'll analyze the table and replace the placeholders with the corresponding information. The masked entities are [ ENT ] in the following sentence: "the [ ENT ] finished the regular [ ENT ] with a [ ENT ] [ ENT ] record." From the table, I can see that: - The team that finished the season is the Miami Dolphins. - The regular season refers to the 16-game regular season. - The team with the best record is not explicitly stated in the table, but we can calculate it from the wins and losses. First, let's calculate the number of wins and losses: Wins: 11 Losses: 5. Since the team finished the regular season, they must have played 16 games. The number of ties is not mentioned in the table. Now, let's fill in the sentence: "The Miami Dolphins finished the regular season with a 11 - 5 record." Here's the completed sentence with the filled-in entities: "The Miami Dolphins finished the regular season with a 11 - 5 record."
