

To fill in the masked entities in the sentence, we need to find the corresponding values in the table. The sentence is: "the dolphins' defense recorded 2 shut out during the [ENT]." From the table, we can see that the team "dolphins" is mentioned in the first row, where the "opponent" is "buffalo bills". However, this is not the correct answer because "dolphin's" is the plural form of the team name. The correct answer is the team name "dolphins" itself. Now, we need to find the entity that corresponds to "shut out". In the table, a shut out is recorded when the final score is "win" (win) with a score of "0". So, the sentence with the masked entities filled in is: "the dolphins' defense recorded 2 shut out during the 1983 season."
