

To fill in the entities masked by [ ENT ], we need to identify the entities in the given sentence and match them with the corresponding values from the table . The sentence is : " the closest game of the [ ENT ] occurred at the [ ENT ] between [ ENT ], who scored [ ENT ], and [ ENT ], who scored 9 . 2 ." Based on the table , we can fill in the entities as follows : - [ ENT ] = Venue : Glen ferrie Oval - [ ENT ] = Home team : Hawth orn - [ ENT ] = Away team : Richmond - [ ENT ] = Date : 25 June 1927 - [ ENT ] = Score : 9 . 2 The filled -in sentence is : " the closest game of the Glen ferrie Oval occurred at the Hawth orn between Hawth orn , who scored 9 . 2 , and Richmond , who scored 9 . 2 ." However , the sentence contains an inconsistency with the score of the Hawth orn player mentioned in the sentence , which is 9 . 2 , but in the table , the Hawth orn team scored 9 . 6 . The correct sentence should be : "The closest game of the Glen ferrie Oval occurred at the Hawth orn between Hawth orn , who scored 9 . 6 , and Richmond , who scored 9 . 2 ."
