Based on the table, the sentence "[ENT] was the only [ENT] with [ENT] as a [ENT] in the [ENT]" can be filled in as follows: "Stirling Moss was the only driver with 7 wins as a driver in the 1961 Formula One season." Here's the breakdown:
- [ENT] = Stirling Moss (He won the most races among all drivers in the 1961 season)
- [ENT] = driver (He was a driver, not a constructor or another entity)
- [ENT] = 7 wins (He won 7 races in the season)
- [ENT] = driver (Again, emphasizing that he won as a driver, not as a constructor)
- [ENT] = 1961 Formula One season (The specific season in which he achieved these wins)
