To fill in the entities masked by [ENT] in the given sentence, we need to analyze the table and identify the entities that match each [ENT].

The sentence is : " the game at [ENT] had the largest [ENT], while the game at [ENT] saw the smallest ." Based on the table, we can fill in the entities as follows: - The largest game by score : The game at Collingwood had the largest score, which is 83 points. - The smallest game by score : The game at Melbourne saw the smallest score, which is 51 points. So, the completed sentence is : " the game at Collingwood had the largest score, while the game at Melbourne saw the smallest ."
