Based on the table provided, the sentence "[ENT] and [ENT] had an average [ENT] of 9.12" can be filled in as follows: "Carlton and Fitzroy had an average score of 9.12." Here's why: - The last row of the table shows a game between Carlton and Fitzroy. - The average score of Carlton (12.12) and Fitzroy (11.11) is (12.12 + 11.11) / 2 = 9.12.
