Based on the table provided, the sentence "4 [ENT] drove [ENT] in the 1920's and [ENT]'s" can be filled in as follows: "4 **Drivers** drove **cars** **in the 1920's and **Tazio Nuvolari**'s." Here's the reasoning: - [ENT] is replaced with "Drivers" as the table lists different drivers for each year. - [ENT] is replaced with "cars" as the table lists different constructors (car manufacturers) for each driver. - [ENT]'s is replaced with "Tazio Nuvolari" as he is the first driver listed in the table who drove in the 1920's.
